AYUSH MACHHI

AI/ML Engineer | Full Stack Web Developer

Vadodara, Gujarat | 6353032373 | ayushmachhi1915@gmail.com

linkedin.com/in/ayush-machhi-23023b3aa | github.com/Aayushdev19

SUMMARY

AI/ML-focused Full Stack Developer with hands-on experience building production-style web applications integrated with machine learning models (React.js, FastAPI, Node.js, MongoDB). Completed a Machine Learning internship building and evaluating regression and classification models. Shipped two end-to-end AI-powered systems combining OCR, Computer Vision, and NLP with RESTful APIs. Strong foundation in data cleaning, EDA, and model evaluation using Scikit-learn and TensorFlow. Seeking AI/ML Engineer or Full Stack Developer internship/entry-level roles.

EDUCATION

Bachelor of Technology in Computer Science and Engineering Aug 2023 – 2027

Parul University, Vadodara, Gujarat

12th (GSEB), R.P.T.P Science College — 2023 | 10th (GSEB), GVM Vidyapith — 2020

SKILLS

Programming Languages: Python, SQL, C, JavaScript

Machine Learning: Scikit-learn, TensorFlow, Regression, Classification, Feature Engineering

Data Analysis: Pandas, NumPy, Data Cleaning, Data Validation, Exploratory Data Analysis (EDA), Matplotlib

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Backend: FastAPI, Node.js, Express.js, REST API

Databases: MongoDB, MySQL

Tools & Platforms: Git, GitHub, Jupyter Notebook, Google Colab, VS Code, Postman

EXPERIENCE

Machine Learning Intern — SystemTron *Mar 2026 – Apr 2026 (4 weeks)*

- Built and trained regression and classification models on real-world datasets using Python and Scikit-learn, covering the full pipeline from raw data to trained model.
- Performed data cleaning, preprocessing, and Exploratory Data Analysis (EDA) using Pandas and NumPy to prepare datasets for model training.
- Evaluated model performance using accuracy, precision, recall, and confusion matrix metrics, and tuned hyperparameters to improve results.
- Visualized data trends and model outputs using Matplotlib to communicate findings clearly.

PROJECTS

ScanAI — AI-Powered Image Verification & OCR System Live Demo | GitHub Repo

- Developed a full-stack image authenticity verification platform using React.js, FastAPI, and MongoDB, serving real-time verification results through a REST API.
- Integrated OCR, Computer Vision, and NLP models to extract and cross-validate document data, producing an authenticity confidence score for each upload.
- Designed a responsive analytics dashboard for file upload, verification history, and scoring trends; built and documented RESTful API endpoints, using Git for version control.

SmartLand AI — Data-Driven Land Valuation & Prediction Platform Live Demo | GitHub Repo

- Built a land price prediction platform using a Linear Regression model trained on historical land-sale data, exposed through a FastAPI backend.
- Cleaned and processed datasets with Pandas and NumPy, engineering features (location, area, amenities) to improve prediction accuracy.
- Developed an interactive React.js dashboard for entering land parameters and instantly viewing predicted valuations with supporting visualizations; stored application data in MongoDB.

ACHIEVEMENTS

- Incubated at PIERC Cohort 9 for developing SheGuard, an IoT-enabled women's safety startup; selected for SSIP grant support.
- Participated in ISRO Hackathon 2025, collaborating in a team to design and develop a software solution under time constraints.

CERTIFICATIONS

- Machine Learning Internship — SystemTron (AICTE-affiliated) — Apr 2026
- Python Programming — SystemTron — Apr 2026
- Complete Web Development Course — Udemy — Dec 2025
